

ZoomRx - Pre-induction

CSS

Wherever possible, provide examples

1. In how many ways can a CSS be integrated as a web page and tell the order in which the style will be added?
2. What is a CSS selector?
3. What is CSS Box Model and what are its elements?
4. What are pseudo classes and what are they used for?
5. What is the use of “important” keyword?
6. Define the float property of CSS?
7. Difference between display none and visibility hidden?
8. What are position properties in CSS?
9. How did the Z index function do?
10. List out the CSS measurement unit?
11. What is CSS specificity?
12. Differentiate between inline and block element?
13. How is the concept of inheritance applied in CSS?
14. How could you apply css rules specific to a media?
15. What do you know about the transition?
